Landforms that define the region

The Black Rock Desert Plan

The Black Rock Desert Plan protects 910,000 acres of desert wilderness in Nevada.

Mountain Ranges

Almost every winter, the Calico Mountains 28 miles and roads display a shadow of cantilever like unique rock formations. The unique terrain and geology of the range include thousands of dramatic rock formations and canyons that stud the range and allow access to the Calico Mountains. Protecting the Calico range is important to preserving the dramatic beauty of the range and providing access to the Calico Mountains. Although the Calico ranges stretch nearly 50 miles north from the Black Rock Desert, the range is a part of the Great Basin and is important to the survival of the desert wildlife and ecosystems in the Great Basin. The Black Rock Desert is surrounded by the Black Rock Desert National Conservation Area. The range is home to unique and diverse plant and animal life that is important to the survival of the desert ecosystem. The range is home to the unique and diverse plant and animal life that is important to the survival of the desert ecosystem.

Other Users.
